

MD RASHED AHMED

Senior Frontend Engineer | React, TypeScript, Mapbox, Micro-frontends

Brisbane, QLD | mdrashedahmed.work@gmail.com | +61 461 380 881

[LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [Stack Overflow](#)

Work rights: Full-time in Australia

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 7 years of experience building production React and TypeScript applications, from a learning platform serving 3M+ students to real-time operations software for road authorities. Specialise in map-driven interfaces and large-scale migrations, and currently deliver features in a major map modernisation at Transmax. Experienced across large monorepos, shared component libraries and micro-frontend architectures. Own work end to end (design, implementation, testing, code review and release), and known for tracking down hard-to-reproduce bugs and mentoring other engineers.

CORE SKILLS

Frontend: React, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3

Maps & Real-time: Mapbox GL, Google Maps API, GeoJSON, WebSocket

Architecture: Micro-frontends (Module Federation), monorepos (pnpm, Turborepo), shared libraries, design systems

State & Data: React Query, Redux, Zustand, Jotai, GraphQL (Apollo), gRPC, REST

UI: Material UI, Tailwind CSS, Styled Components, Storybook, accessibility (WCAG)

Quality & Delivery: Jest, React Testing Library, Cypress, GitLab CI/CD, Kubernetes, Agile/Scrum, Jira

AI-assisted development: Claude Code, Cursor, prompt design, AI-assisted code review and testing

PROFESSIONAL EXPERIENCE

Frontend Developer | Transmax, Brisbane

May 2026 – Present

Government-owned provider of STREAMS, an award-winning intelligent transport platform used by 13+ traffic management centres and managing 100,000+ road devices across Australia

Part of the team migrating the core operations map from a legacy plugin-based implementation to a modern shared map platform. Own features end to end across the main dashboard, a shared map library and the design system.

- Delivered saving and restoring of operators' map layers and filters with no flicker or lost state, and contributed the supporting change to the shared map library.
- Shipped live bus, train, ferry and tram tracking, plus a route-view mode showing a route's line, stops and live vehicles.
- Built road search by state road and distance marker, so operators can find and highlight a stretch of road in seconds.
- Migrated device and public transport layers from legacy code onto the shared platform, reducing duplication across products.
- Diagnosed a screen-blanking bug caused by incompatible library versions across independently deployed apps, and fixed it at the source.
- Investigated stale content appearing after releases, and published a root-cause report with recommended next steps.
- Wrote unit and component tests for every change, validated work on Kubernetes environments, and took it through code review and QA.
- Use AI coding assistants to speed up exploration, refactoring and test writing in a large multi-repo codebase, reviewing and verifying all output before it ships.
- Shipped 15+ features and fixes across five codebases since joining, including shared libraries and design-system assets used by other teams' products.

Senior React Developer (Contract) | Hapana, via Aviato Consulting, Sydney

Oct 2025 – Dec 2025

Gym management SaaS platform

- Designed a reusable client alert system used across subscriptions, payments, account status, birthdays and location-based alerts.
- Created a centralised alert UI architecture in a large monorepo, removing duplication and letting alerts be reused across workflows.
- Documented the components in Storybook, and integrated GraphQL APIs for real-time client data.
- Improved performance through component refactoring and render optimisation.
- Worked closely with designers, backend engineers and product stakeholders in an Agile team.

Shikho | Dhaka, Bangladesh (Remote/Hybrid)

Dec 2021 – Jun 2025

*Leading Bangladeshi ed-tech platform serving 3M+ students. Learner First Award (2023) for UX quality, accessibility and product impact.***Senior Software Engineer (Frontend)**

Aug 2023 – Jun 2025

- Architected a real-time online exam experience for 15,000+ concurrent students, using React and WebSocket for live scoring and countdowns.
- Optimised website load times by 20–25%, improving user retention and satisfaction.
- Delivered accessible interfaces for AI-powered learning features, and integrated the Google Maps API for interactive visualisations.
- Built real-time analytics and watch-log tracking, and created shared UI component libraries that standardised development across teams.
- Mentored junior developers, raising team productivity and code quality.

Software Engineer (Frontend)

Dec 2021 – Jul 2023

- Built and maintained high-traffic web applications with 2.5M+ quarterly unique users.
- Worked with UX designers to improve engagement and conversion rates.
- Integrated third-party APIs and analytics tools, reducing operational costs by about AUD 100,000 per year.

Software Engineer (Frontend) | Misfit Technologies, Dhaka, Bangladesh

Mar 2021 – Nov 2021

- Introduced a mobile-first approach with React and Tailwind CSS, increasing mobile traffic by 25%.
- Enforced web standards, reducing code-review discrepancies by 20%, and worked with backend developers to resolve frontend issues.

Junior Software Engineer | Workspace InfoTech, Dhaka, Bangladesh

Jun 2019 – Mar 2021

- Contributed to 20+ websites and their backend modules (Node.js/Express.js, Django), wrote 200+ SQL queries (MySQL, MongoDB), and handled testing and troubleshooting.

EDUCATION**BSc in Software Engineering**, American International University–Bangladesh (AIUB) | CGPA 3.55/4.00 2015 – 2021
